Introduction

Purpose of the System

- The Demo Web Shop is an e-commerce web application that allows users to browse products, register accounts, add items to a shopping cart, and place orders online. It is designed to demonstrate core online shopping functionalities.

Core Features

- User registration and login
- Product browsing and search
- Add to cart and update cart
- Checkout and order placement
- Payment and billing information handling
- User profile and order history

Scope of Testing

The scope of testing covers manual and automated testing of the Demo Web Shop focusing on

1. Functional testing
2. Usability testing
3. UI/UX testing
4. Boundary and negative testing

Out-of-scope areas include third-party payment gateway validations and server-side performance testing.

QA & Testing Processes

The following QA and testing process was followed during this project:

1. Requirement analysis and identification of testable requirements
2. Test planning and test condition identification
3. Test case design (manual test cases)
4. Test execution and result recording
5. Defect identification and logging
6. Test automation for selected critical test cases
7. Test result analysis and reporting
8. Decision making and recommendations

Testing Requirements

The key testing requirements identified for the system are:

1. User registration must validate mandatory fields correctly
2. Login functionality must allow access with valid credentials only
3. Product navigation and search must work correctly
4. Shopping cart must update items and quantities accurately
5. Shopping cart must update items and quantities accurately
6. System must display proper error messages for invalid inputs
7. UI elements must be consistent and user-friendly

Test Case Document (Summary)

Manual testing

A total of 40 manual test cases were designed and executed covering the following categories:

- Functional Testing: 21 test cases
- Usability Testing: 4 test cases
- UI/UX Testing: 5 test cases
- Boundary & Negative Testing: 10 test cases

Each test case includes:

- Test Case ID
- Test Scenario / Description
- Preconditions
- Test Steps
- Expected Result
- Actual Result (with evidence)
- Status (Pass / Fail)

Functional testing

Test Case ID	Test Case Name	Test Case Description	Pre-conditions	Test Input Data	Test Steps	Expected Results	Actual Results	Priority	Pass/Fail Status	Evidence
TC_001	User Registration	Verify new user registration	User is on Registration page	Valid gender, first name, last name, email, password, confirm password	1. Open website 2. Register 3. Fill valid details 4. Click register button	Registration successful message displayed	Account created successfully	High	Pass	Message displayed: "Your registration completed"
TC_002	Duplicate Registration	Register with existing email	Email already registered	Register with same email	1. Open website 2. Register 3. Fill valid details 4. Click register button	Error message shown	Error message shown	High	Pass	Message displayed: "The specified email already exists"
TC_003	Valid User Login	Verify login with valid credentials	User is registered	Valid email & password	1. Click Login 2. Enter valid credentials 3. Click login button	User logged in, redirected to homepage	User logged in, redirected to homepage	High	Pass	User logged into dashboard
TC_004	Logout	Verify user logout	User logged in	N/A	1. Click logout	User logged out, redirected to homepage	User logged out, redirected to homepage	High	Pass	User logged out and redirected to homepage
TC_005	Search Valid Product	Search product with valid keyword	Homepage open	Keyword: Laptop	1. Enter keyword 2. Search	Search results displayed with the product	Search results displayed with the product	High	Pass	Search results displayed with the product
TC_006	Add to Cart	Add product to cart	Product available	Select product	1. Open product 2. Click Add to Cart	Product added to cart	Product added to cart	High	Pass	The product has been added to your shopping cart
TC_007	Update Cart Quantity	Verify update quantity	Product already added to cart	Quantity: 2	1. Open shopping cart 2. Put a tick for remove product 3. Click Update Shopping Cart button	Quantity updated correctly	Quantity updated correctly	High	Pass	Refresh the page and update product quantity
TC_008	Remove product	Remove product from cart	Product in cart	N/A	1. Open shopping cart 2. Put a tick for remove product 3. Click Update Shopping Cart button	Product removed successfully	Product removed successfully	High	Pass	Refresh the page and remove product from the shopping cart
TC_009	View empty cart	No products have been added to the cart	No products	N/A	1. Open shopping cart	Empty cart message	Empty cart message	Medium	Pass	Message displayed: "Your cart is empty"
TC_010	Checkout with login	Verify login required for checkout	Cart has product	N/A	1. Open shopping cart 2. Click "Checkout" button	Checkout steps are displayed	Checkout steps are displayed	High	Pass	Checkout steps are displayed
TC_011	Checkout with valid details	Verify successful checkout	Logged in user	Valid address and payment details	Complete checkout process	Order placed successfully	Order placed successfully and confirmation page shown	High	Pass	Order placed successfully with valid checkout details
TC_012	Select Shipping Method	Verify shipping selection	Checkout process started	Shipping option	Select shipping method	Shipping cost applied	Shipping method selected and cost updated correctly	Medium	Pass	Selected shipping method applied correctly
TC_013	Select Payment Method	Verify payment method selection	Checkout process started	Payment option	Select payment option	Payment option accepted	Payment method selection accepted without validation	High	Pass	Payment method selected successfully
TC_014	Order Confirmation	Verify order confirmation	Payment completed	N/A	Confirm order	Confirmation message displayed	Order confirmation message displayed with order number	High	Pass	Order confirmation page displayed with order number
TC_015	Category Navigation	Verify category links open correct pages	Homepage open	Click "Books" category	1. Open homepage 2. Click category	Books category page displayed	Books category page displayed	Medium	Pass	
TC_016	Access Cart Without Login	Verify restricted access	User logged out	Cart URL	Access Cart	Redirected to login	User redirected to login page when accessing cart directly	High	Pass	System redirected user to login when accessing cart directly
TC_017	Refresh After Logout	Check session termination	User logged in	Browser refreshed	Logout and refresh	User remains logged out	User remained logged out after refresh	High	Pass	User stayed logged out after page refresh
TC_018	Product Details Page	Verify product details page loads correctly	Category page open	Click product name	1. Open category page 2. Click any product	Product image, price, description visible	Product image, price, description visible, add to cart button	High	Pass	
TC_019	Order History	Verify placed order appears in order history	Order placed	N/A	1. Navigate to My Account 2. View Orders	Order listed	Order listed	Medium	Pass	
TC_020	Update Account Information	Verify profile update	User is registered	Valid gender, first name, last name, email, password, confirm password	1. Navigate to My Account → Customer Info 2. Modify details 3. Click Save button	Success message is displayed	Customer information was updated. No success confirmation message displayed	High	Fail	
TC_021	Change Password	Verify password change	User logged in	Old password, New password, Confirm password	1. Navigate to My Account → Change Password 2. Fill valid details 3. Click Change Password button	Success message is displayed and updated	Success message is displayed and updated	High	Pass	Message displayed: "Password was changed"

Boundary and negative testing

Test Case ID	Test Case Name	Test Case Description	Pre-conditions	Test Input Data	Test Steps	Expected Results	Actual Results	Priority	Pass/Fail Status	Evidence
TC_031	Register with empty fields	Verify mandatory field validation	User is on Registration page	Leave all fields empty	1.Submit empty form	Validation messages displayed for required fields	Validation messages displayed for required fields	High	Pass	Validation messages displayed for required fields Ex:- First name is required.
TC_032	Invalid Email	Enter a invalid email	User is registered	Invalid email	1. Enter wrong email	Error message shown	Error message shown	High	Pass	Message displayed: "Login was unsuccessful.Please correct the errors and try again. The credentials provided are incorrect"
TC_033	Invalid Password	Login with invalid password	User is registered	Correct email, wrong password	1. Enter wrong password 2.Click login button	Error message shown	Error message shown	High	Pass	Message displayed: "Login was unsuccessful.Please correct the errors and try again. The credentials provided are incorrect"
TC_034	Login with empty fields	Empty fields login	User is on Login page	Leave all fields empty	1.Click Login	Error message shown	Error message shown	High	Pass	Login was unsuccessful.
TC_035	Password minimum length	Verify password minimum length	User is on Registration page	Minimum length password	1.Fill details with minimum length password 2.Click register button	Password accepted	Minimum length password accepted successfully	Medium	Pass	Minimum length password was accepted by the system
TC_036	Password Below Minimum Length	Verify short password rejection	User is on Registration page	Short password	1.Fill details with short length password (Ex: 123) 2.Click register button	Validation error	Short password rejected with validation error	High	Pass	Short password was rejected with validation message "The password should have at least 6 characters"
TC_037	Maximum Quantity Limit	Check quantity upper limit	Product in cart	Large quantity value	1.Update quantity 2.Click Update Save Changes	Quantity restricted	Error message displayed	Medium	Pass	Show message "The maximum quantity allowed for purchase is 10000"
TC_038	Add Zero Quantity	Error when adding quantity zero	Cart open	Update Qty = 0	1.Set zero 2.Update	Error message displayed	Error message displayed	High	Pass	Show message "Your shopping cart is empty"
TC_039	Search Empty Input	Verify search with empty input	Homepage open	Empty search	1.Click search	All products or no result message	Error message shown	Medium	Pass	Message displayed: "Please enter some search keyword"
TC_040	Change password with incorrect current password	Verify validation for incorrect current password.	User logged in	Wrong old password, New password, Confirm password	1.Navigate to My Account → Change Password 2.Fill invalid details 3.Click Change Password button	Error message displayed	Error message displayed	High	Pass	Message displayed: "Old password doesn't match"

Remove	Product(s)	Price	Qty.	Total
☐	 Computing and Internet	10.00	110	1100.00

The maximum quantity allowed for purchase is 10000.

Test Automation

Selected Test Cases for Automation

The following critical test cases were selected for automation:

1. User Login with valid credentials
2. User Login with invalid credentials
3. Add product to shopping cart
4. Search product with valid keyword

Automation Tool Used

- **Tool:** Selenium WebDriver
- **Language:** Java
- **Browser:** Google Chrome

Automation Results

All selected automated test cases were executed successfully. Execution reports and logs were captured as evidence and included in the report appendix.

            By.xpath(xpathExpression: "//input[@value='Search']")
        );
        searchButton.click();

        // Verify search results page
        WebElement searchResult = wait.until(
            ExpectedConditions.visibilityOfElementLocated(
                By.linkText("14.1-inch Laptop")
            )
        );

        Assert.assertTrue(searchResult.isDisplayed(),
            message: "Valid search did not return expected product");

        driver.quit();
    }
}

```

Defect Report

Defects were logged separately for failed test cases. Each defect includes,

- Defect ID
- Summary
- Steps to Reproduce
- Expected Result
- Actual Result
- Priority
- Linked Test Case ID

Defect ID	Summary	Steps to reproduce	Expected Result	Actual Result	Priority	Linked Test Case ID
DEF_001	Success message is not displayed after updating customer information	"1.Navigate to My Account → Customer info 2.Modify details 3.Click Save button"	Customer information should be updated successfully A success confirmation message should be displayed to the user	Customer information is updated successfully No success confirmation message is displayed	Medium	TC_020
DEF_002	"Add to Cart" button missing in some product listing/card	1.Navigate to a product category 2.Check for "Add to Cart" button on each product card	Add to Cart button display and clickable for all products	Some buttons are missing	High	TC_029
DEF_003	Responsive design issues on resize window	Resize window	Layout adjusts	Layout partially breaks on smaller window resize	Medium	TC_027
DEF_004	Currency type is missing from product prices	Open website and observe the product price	Prices with a currency type and two decimal places (Ex: \$10.00)	Decimal format is correct but the currency type is missing	High	TC_030

Test Coverage Report

The test coverage achieved is summarized below

- Requirements covered: 100%
- Functional coverage: High
- Usability & UI coverage: Adequate
- Boundary & negative scenarios: Covered for critical areas

Overall test coverage was sufficient to assess the quality and readiness of the system.

Assumptions, Decisions & Suggestions

Assumptions

- Test environment was stable during execution
- Test data used was valid and reusable
- Internet connectivity was consistent

Release Decision

Decision will be: GO

Based on the test results, the system is stable with minor non-critical issues and is suitable for release.

Suggestions & Improvements

- Improve validation messages for better user guidance
- Enhance UI consistency across pages
- Add more negative test scenarios for checkout process
- Implement automated regression testing for future releases

Conclusion

The Software Quality Engineering course work successfully demonstrated the application of manual and automated testing techniques. The Demo Web Shop system was tested thoroughly, defects were identified and documented, and quality-related decisions were made based on evidence-driven results.
